

# Prior Authorization Automation Service

Put your focus on patients rather than payer calls

PracticeSuite's prior authorization service helps ensure that your patients receive the timely care they require and that you get fully paid. We eliminate the frustration of obtaining authorizations by seamlessly managing your entire precertification process, allowing you to focus on what's important – patient care.

Time is of the essence when it comes to patient care. Delays in preauthorization contribute directly to rx abandonment and they negatively impact adherence to care plans.

Our software automation and expert service teams provide the edge you need to be confident that each and every authorization is requested and obtained properly, in the shortest possible time.

Missing or improperly obtained authorizations are one of the top drivers of denials and outstanding patient balances

Our expert services team not only know when authorizations are required, but they obtain them quickly and manage the process effectively using proprietary software that enables them to:

- ✔ Efficiently detect missing authorizations.
- ✔ Ensure that all required data is organized and forwarded to the payer in the required format.
- ✔ Follow up tirelessly to ensure authorizations are obtained.
- ✔ Ensure that denials and days in A/R are avoided.

**What will you do with an extra 16 hours per week?**

Today is the day to end the misery of obtaining prior authorization.

**Get paid more. Get paid faster.**

**Call PracticeSuite (510) 284-2425**
